As more and more jobs and educational offerings are available online, the ability to navigate the Internet is critical to participate more fully in the economy. Jumpstarted by a federal interagency working group dedicated to spurring the advancement of digital literacy across all age groups and stages of learning, the Digital Literacy portal organizes content conveniently, enables valuable discussion and collaboration among users and elevates best practices to improve the quality of digital literacy offerings. We invite users to share their content and their ideas to make the portal more robust and to fulfill its role as a destination for practitioners devoted to enhancing digital opportunity for all Americans.
